Advanced methodology course: Comparative Methods - From the Local to the Global

About the course

subject

Global Studies / Internationale udviklingsstudier / International Public Administration and Politics / Politik / Politik og forvaltning

activitytype

master course

Teaching language

English

Registration

You register for activities through <u>stads selvbetjening</u> during the announced registration period, which you can see on the <u>Study administration homepage</u>.

When registering for courses, please be aware of the potential conflicts and overlaps between course and exam time and dates. The planning of course activities at Roskilde University is based on the recommended study programmes, which should not overlap. However, if you choose optional courses and/or study plans that goes beyond the recommended study programmes, an overlap of lectures or exam dates may occur depending on which courses you choose.

In case of too few registrations, the course will be cancelled.

Detailed description of content

Conducting comparisons is an integral part of almost all research. This course allows participants to master different comparison strategies, and provides insights into the advantages and disadvantages of various methods for comparisons on different analytical levels. These skills should help participants improve the research design of their master theses or projects.

Participants are introduced to both basic as well as advanced tools for conducting political comparisons including (but not limited to) single-country comparisons; few country comparisons; many countries comparisons; counterfactual and before/after comparisons; deductive comparisons; inductive comparisons; most similar case comparisons; most different case comparisons; the nested approach for comparisons, and fuzzy sets comparisons.

Knowledge:

– Knowledge of core concepts in comparative methods. – Knowledge of key research designs using comparative methods.

Skills:

- Skills in choosing the most useful comparative method given the research question Skills in applying comparative methods and tools to a concrete research theme.
- Skills in categorizing different methods based on advantages and disadvantages.

Competencies:

– Competencies to cooperate with peers in the application of different comparative methods in relation to relevant research areas. – Competencies to take responsibility for own learning by independently elaborating a comparative methodological plan for larger research projects.

Expected work effort (ECTS-declaration)

Class teaching: 20 (5 double sessions (4 hours each)) Active involvement: 25 (student exercises) Preparation: 60 (6 hours per double session) Examination: 30 (reading up and the actual exam) Hours - total: 135

Evaluationand feedback forms

There will be an opportunity to get oral feedback on the exercises and discussions in class.

Participants can expect to have collective feedback on the written exams (as whole), as well as the opportunity for oral feedback in person for the individual written exams.

Administration of exams

ISE Studyadministration (ise-studyadministration@ruc.dk)

Responsible for the activity

Olivier Rubin (rubin@ruc.dk)

ECTS

5

Learning outcomes and assessment criteria

• Knowledge and understanding:

Knowledge and understanding of academic and/or scientifically based practiceoriented methods and their application and relevance on an advanced level

- Being able to communicate and discuss academic and/or scientifically based practiceoriented studies in a type of language that is correct, clear, professionally accurate, wellstructured and well-argued
- Skills:

Carrying out studies and analyses with the aid of academic and/or scientifically based practice-oriented methods

- Evaluating and selecting methods from research-related and professional practices
- Competences:

Co-operation with colleagues in the application of various academic and/or scientifically based practice-oriented methods and forms of analysis in relation to relevant issues in research-related and professional contexts

 Reflection on one's own learning and taking responsibility for one's own professional development

Overall	
content	

- Research and professional premises for academic and scientifically based practiceoriented analyses
- Approaches to the use of academic and/or scientifically based practice-oriented tools in research and professional contexts, respectively

Teaching and working methods

Lectures, exercises, student presentations, peer feedback and discussions. The course requires that the students contribute and participate actively.

Type of activity

Elective course

Form of examination (p1)

Individual written take-home assignment given by the lecturer.

The character limit of the assignment is: maximum 14,400 characters, including spaces. The character limit includes the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices.

The duration of the take-home assignment is 48 hours and may include weekends and public holidays.

Assessment: 7-point grading scale.

Form of Reexamination (p1)

Samme som ordinær eksamen

Exam code(s) Exam code(s): U40915

Course days:

Hold: 1
