Detailed description of content	The course has the form of an advanced topics course. Students are introduced to a range of contemporary and advanced topics of research within strategy and finance. These could include non-market strategy; managerial cognition; real options; financial options and derivatives; behavioral finance; uncertainty, and risk. Students are introduced to a range of analytical tools and perspectives. These allow students to critically reflect on contemporary issues of strategy and finance. Students learn methods and theories that they can use afterwards in their professional lives when analyzing firms and undertaking decisions that require strategic and financial understanding. Students gain skills in critically analyzing and communicating knowledge about problems regarding the strategic and financial management of the company. Finally, they gain competences to reflect on the usefulness of theories and tools in practice, and to reflect on their own decision-making.
Course material and Reading list	The course literature varies and is a collection of articles and chapters of different sources indicated by the teachers.
Overall plan and expected work effort	In class teaching (lectures): 20 hours Individual study: 80 hours Exam (including preparation): 35 hours Total study intensity: 135 hours
